Stem Cell Transplantation Indication

- 1- Hemoglobinopathies**
- 2- Anemias (Severe Aplastic Anemia, Fanconi Anemia,..)**
- 3- Disorders of Immune System (LAD, SCID, WAS, Kostmann, Job, Griscelli,...)**
- 4- Metabolic and Storage Disease (Hurler, Gaucher,...)**
- 5- Hematological Malignancies (AML , ALL , CML , MM , Lymphoma,...)**
- 6- Myelofibrosis**
- 7- Autoimmune diseases (RA, SLE, MS, Scleroderma,...)**

Stem Cell Transplantation Indication

•8- Solid tumors: Breast cancer, Ovary, Testis, Ewing Sarcoma , Osteosarcoma, Neuroblastoma

9- Cell Therapy:

Post Infarction (CABG, Angioplasty)

Multiple Sclerosis

Cirrhosis

Avascular Necrosis of Femoral Head

Diabetes Mellitus II

GvHD treatment

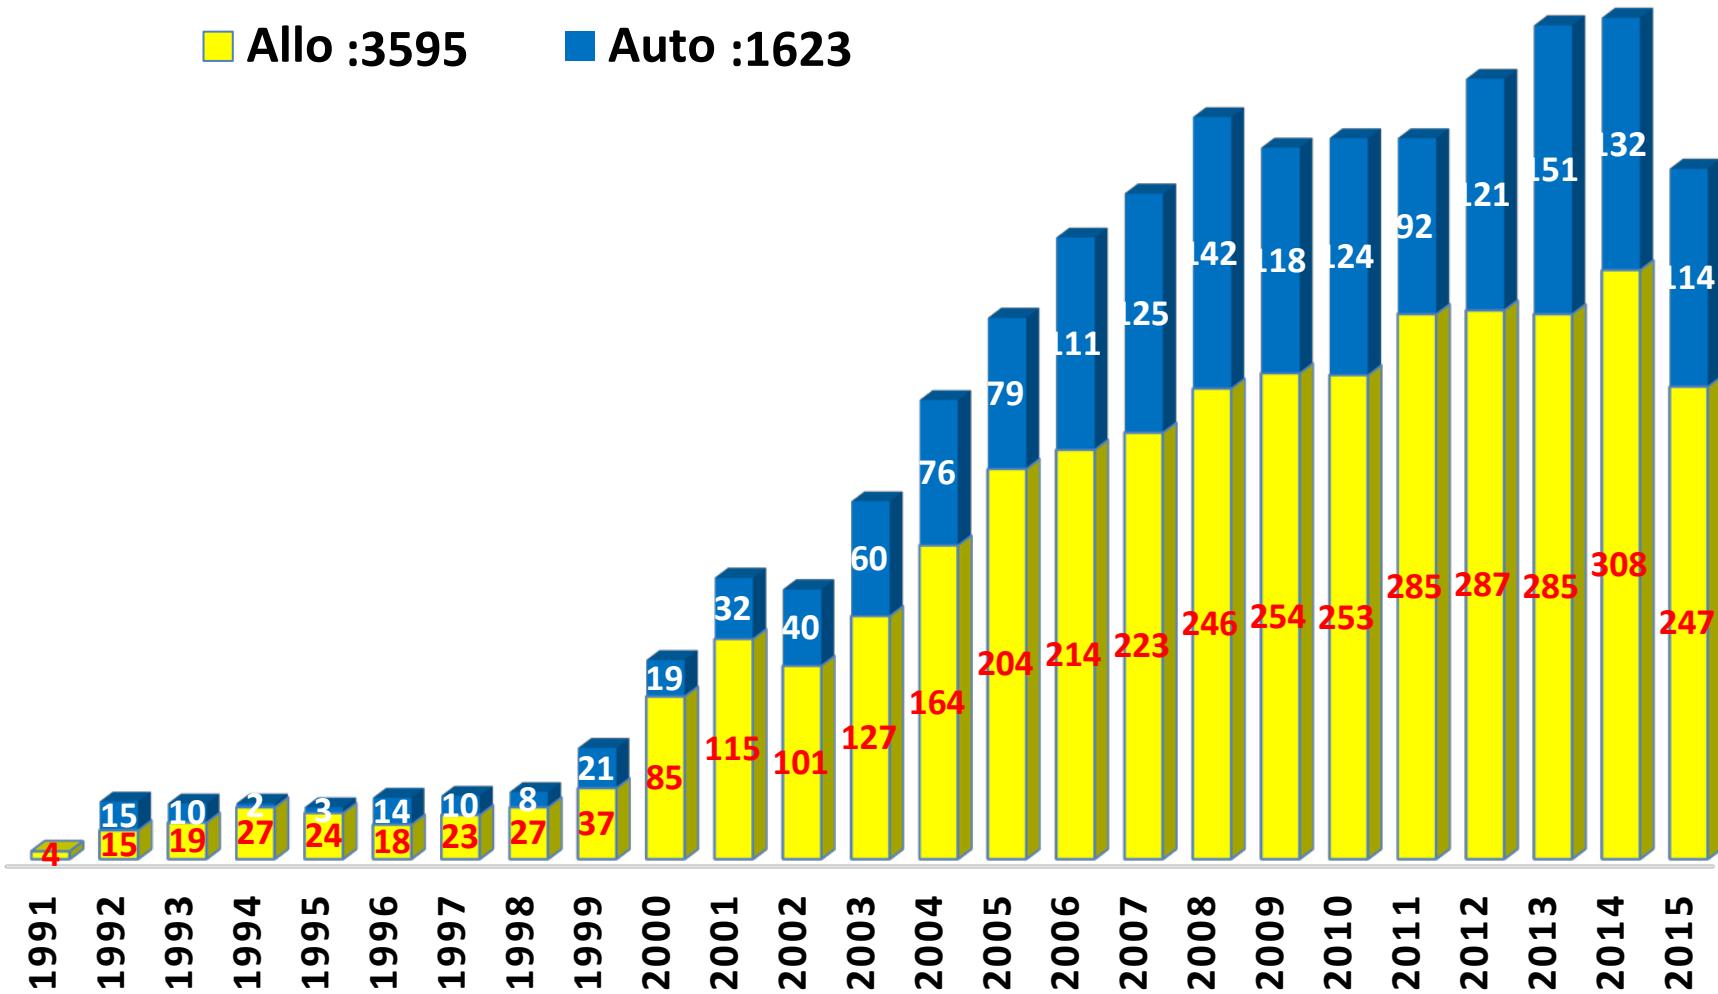

Systematic Lupus Erythematosus

Thalassemia

HSCT 1991- 1st Nov. 2015

■ Allo :3595

| Other | 5 |

Multiple Myeloma Outpatients

DFS & OS

Haploidentical

Start :2007

to May,2, 2015: 80 (patients)

Alive: 67/5% 54

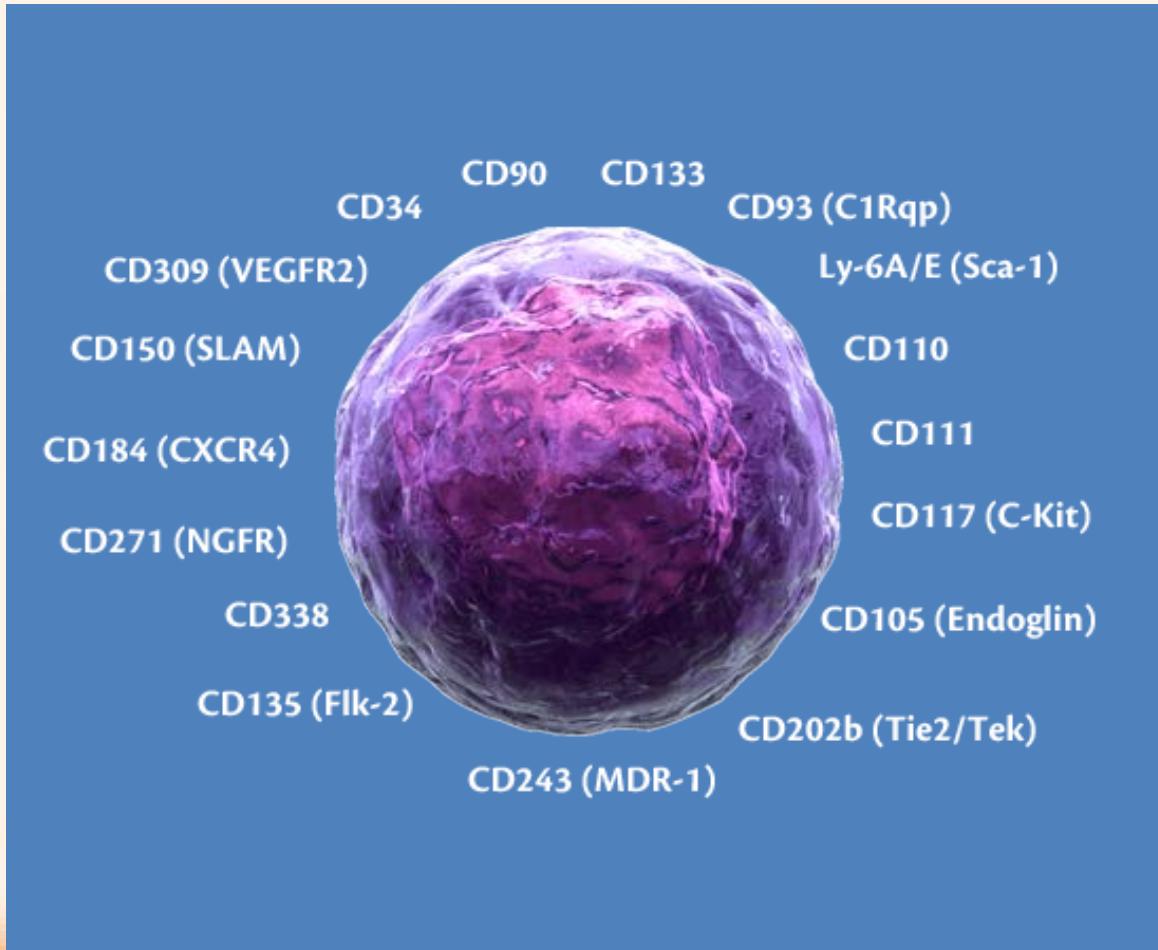

Mortality: 32.4% 26

Studies in Progress

- ❖ Unrelated transplantation
- ❖ Haploidentical HSCT
- ❖ Cord Blood & double Cord Blood HSCT
- ❖ Use of Mesenchymal stem cells

Hematopoietic stem cell

Cord blood Bank

- First Iranian public cord blood bank
- Established at 2002
- Gathering cord blood cells from multiple Gynecology/ Obstetric centers
- First CB transplantation was done at 1998
- 66 Cord blood transplantations done
- Development of bank and new methods of storage and tests
- **3254 stored (3224 HLA-typed)**

HLA- Bank

- Iranian stem cell donor program
• (بانک اهداء کنندگان سلولهای بنیادی) -
- First in Middle - East
- At 1999 joined to BMDW and WMDA
- Search for matched donors all over the world
- It is growing day to day with increasing number of volunteers
- **7589 HLA-typed**
- **21807 direct registered**
